PROFESSIONAL SUMMARY

Senior Data Analyst specialized in Marketing Analytics, CRM and Business Intelligence, with 7+ years turning raw data into measurable business decisions.

At Cogna Educação, I lead the development of data pipelines using a layered architecture (raw → staging → analytics) in BigQuery, with Power BI dashboards that reduced analysis time by 30% and eliminated manual spreadsheet dependency. I work across the full funnel: from ETL data ingestion through to executive-level storytelling for C-level stakeholders. I also architected and built Insider Architect Analytics, a full-stack platform (Next.js, Supabase, BigQuery) that automates ROAS, CPA and ROI calculation by channel for the Relationship Center.

Core Competencies: Business Intelligence | Data Analytics | SQL | Power BI | Python | CRM Analytics | Customer Journey Mapping | ETL | Data Modeling | Dashboard Development | KPI Tracking | Data-Driven Decision Making

TECHNICAL SKILLS

Languages & Databases

- SQL: SQL Server, MySQL, T-SQL, Stored Procedures, Query Optimization, Complex Joins
- Python: Pandas, NumPy, Matplotlib, Data Analysis, Data Cleaning
- R: Statistical Analysis, Data Visualization

Visualization & BI Tools

- Power BI: DAX, Data Modeling, Interactive Dashboards, Power Query, ETL Pipelines
- Tableau: Data Visualization, Business Analytics
- Excel: Pivot Tables, VLOOKUP, Power Query, VBA, Advanced Analysis
- Looker Studio: Google Data Studio, Automated Reports

Platforms & Technologies

- CRM & CDP: Customer Data Platform, Marketing Automation, Campaign Management
- Database Management: SQL Server Management Studio (SSMS), Database Design
- Cloud Computing: Google BigQuery, GCP, AWS Fundamentals
- Web Analytics: Google Analytics, Digital Marketing Analytics
- Methodologies: Agile, Scrum, DevOps, CI/CD
- Version Control: Git, GitHub, Open Source Contribution
- Full-Stack Development: Next.js, React, Tailwind CSS, Supabase (PostgreSQL), Vercel, GitHub Actions, Vitest (TDD)

Analytics & Modeling

- Data Engineering: ETL/ELT Processes, Data Pipeline Architecture, Data Warehouse Design
- Business Intelligence: KPI Development, Metrics Standardization, Performance Analytics
- CRM Analytics: Engagement Metrics, Conversion Funnel Analysis, Customer Segmentation
- Marketing Analytics: ROI Measurement, Campaign Performance, Multi-Channel Attribution

PROFESSIONAL EXPERIENCE

Cogna Educação S/A

May 2024 – Present

São Paulo, SP — Hybrid | Career path: started via outsourced consulting (Jump Label Solutions), with an internal promotion and later direct internalization (CLT) as of Sep/2025

Senior Data Analyst | Marketing Analytics — Direct hire (CLT) Sep 2025 – Present

- Lead Business Intelligence projects focused on CRM Analytics and customer journey optimization across multi-touch channels (email, SMS, WhatsApp)
- Architected and built Insider Architect Analytics, a full-stack platform (Next.js, Supabase/PostgreSQL, BigQuery) that automates ROAS, CPA and ROI calculation by channel and enrollment cycle for the Relationship Center (details in the success case)
- Build Power BI dashboards connected to BigQuery SQL with layered data architecture (raw, staging, analytics), eliminating manual spreadsheet dependency for the CRM team
- Implement strategic KPIs to measure ROI of retention and engagement campaigns, including delivery, open, click, enrollment and registration metrics by channel, period and persona
- Conduct conversion funnel analysis identifying bottlenecks and optimization opportunities, providing actionable insights for marketing investment decisions
- Apply Data Modeling and ETL processes to standardize metrics for the CRM team
- Use advanced SQL (complex joins, CTEs, window functions) to process large data volumes and generate business insights
- Translate complex data into visual storytelling and executive presentations for multi-area stakeholders

Technologies: Power BI, DAX, SQL Server, T-SQL, Customer Data Platform, CRM Analytics, ETL, Data Modeling, Python, Next.js, Supabase, BigQuery

Data Consultant — via Jump Label Solutions (contractor) Apr 2025 – Sep 2025

- Delivered specialized consulting in data analysis, dashboard development and data visualization for the CRM team
- Identified key performance offenders through exploratory data analysis and proposed strategic improvements based on data-driven insights
- Created and maintained interactive Power BI dashboards to monitor marketing and engagement KPIs
- Performed customer segmentation and behavioral analytics to optimize campaigns

Technologies: Power BI, SQL, Data Analysis, Dashboard Design, CRM Metrics

DBM Consultant (Database Marketing) — via Jump Label Solutions (contractor) May 2024 – Apr 2025

- Created, maintained and measured customer journeys in a Customer Data Platform (CDP) for multi-channel campaign automation
- Developed a CRM campaign results measurement framework to demonstrate value and ROI to stakeholders
- Implemented advanced audience segmentation based on behavior, demographics and engagement history
- Automated management reports for journey performance tracking and optimization opportunity identification

Technologies: Customer Data Platform, Marketing Automation, SQL, Campaign Analytics, Customer Journey Mapping

Planning & Database Marketing Analyst

Oct 2021 – Feb 2024

RBrasil Soluções S.A. | São Paulo, SP — Hybrid

- Developed and improved strategic KPIs for operational planning and executive committee decision support
- Created and maintained Stored Procedures and SQL Jobs in SQL Server Management Studio for automated data extraction and transformation
- Implemented management reports for board-level use with automated execution routines, ensuring data quality and consistency
- Executed complex SQL queries for large data volume analysis and strategic planning insights
- Applied database management best practices and query optimization for better performance

Technologies: SQL Server, T-SQL, Stored Procedures, SQL Jobs, SSMS, KPI Development, Automated Reporting

Control Desk Assistant

Sep 2017 – Feb 2021

Flex Contact Center S.A. | São Paulo, SP — On-site

- Monitored operational performance indicators using ASPECT, UIP and Excel tools
- Created and managed contract lists and mailing lists for relationship campaigns

- Performed operational data analysis to identify improvement opportunities
- Developed Excel monitoring reports with pivot tables and trend analysis

Technologies: Advanced Excel, ASPECT, UIP, Performance Analytics, Reporting

SUCCESS CASE

Integrated Multi-Channel CRM Dashboard — Cogna Educação (2025)

Challenge:

Replace manual spreadsheet analyses with an automated monitoring solution for the full CRM journey (email, SMS and WhatsApp), enabling comparison across channels, campaigns and personas for strategic decision-making.

Solution:

- Developed a layered data architecture (raw, staging, analytics) in BigQuery to organize and standardize data from multiple sources
- Created interactive Power BI dashboards with standardized metrics: deliveries, opens, clicks, approved enrollments and registrations
- Implemented conversion rate calculation by period, channel and segment using advanced DAX
- Structured funnel analysis for bottleneck identification and optimization opportunities

Results:

- 30% reduction in marketing team analysis time
- Elimination of manual processes and dependency on multiple spreadsheets
- Single source of truth for campaign investment decisions
- Dashboards adopted as a strategic tool for executive meetings and budget planning

Technologies: Power BI, DAX, SQL Server, T-SQL, ETL, Data Modeling, CRM Analytics

Insider Architect Analytics — Analytics & ROI Platform, Cogna Educação (2026)

Challenge:

Consolidate engagement and campaign metrics from the Insider Architect API with historical conversion, revenue and enrollment data in BigQuery, automating ROAS, CPA and ROI calculation by channel (WhatsApp, Email, SMS, Push) and enrollment cycle for the Relationship Center.

Solution:

- Architected and built a full-stack executive dashboard (Next.js 16, React 19, Tailwind CSS v4, Recharts, Supabase/PostgreSQL and BigQuery), automating ROAS, CPA and ROI calculation by channel and enrollment cycle and eliminating the manual cross-referencing of enrollment data
- Designed resilient ingestion and backfill pipelines (D-1 Vercel Cron, Token Bucket for the API rate limit, and GitHub Actions with auto-chaining in 10-day chunks), working around the 6-hour serverless timeout and syncing months of history in a raw → staging → datamart architecture
- Optimized performance over large data volumes with Materialized Views, tag-based cache revalidation, server-side aggregations and URL-synced server-side pagination, reducing client-side processing and serialization
- Implemented security and governance with Row Level Security, Security Definer functions with a restricted search_path and a custom Taxonomy module, limiting access to corporate domains and ensuring metric consistency, backed by TDD-oriented tests (Vitest) and CI/CD

Results:

- Eliminated the manual processing and cross-referencing of enrollment data
- Gave executives transparency into which channels and journeys drive the most enrollments (Assisted Conversion), supporting marketing budget allocation
- Data consistency ensured through strict governance via the Taxonomy module

Technologies: Next.js, React, Tailwind CSS, Recharts, Supabase (PostgreSQL), BigQuery, Vercel, GitHub Actions, Vitest

EDUCATION

B.Tech in Data Science 2025 – 2027 (in progress)

Anhanguera Educação

Machine Learning, Deep Learning, Statistical Modeling and Data Science. Full scholarship granted by the school's parent company, my current employer.

B.Tech in Systems Analysis and Development 2023 – 2026 (in progress)

Faculdade Impacta

Software development, algorithms and data structures. Started in 2023, paused enrollment in 2024, and resumed in 2025.

CERTIFICATIONS & COURSES

Data Analysis & Business Intelligence

- Best Practices for Power BI Reports — Cogna Educação | Mar 2026
- Business Intelligence (BI) — FIAP | Sep 2025
- Big Data & Analytics — FIAP | Sep 2025
- Data Analysis in Power BI (4h) — Fundação Bradesco | Aug 2023
- Visualizing Data in Power BI (10h) — Fundação Bradesco | Aug 2023
- Modeling Data in Power BI (11h) — Fundação Bradesco | Apr 2023
- Preparing Data for Analysis – Power BI (7h) — Fundação Bradesco | Apr 2023
- Introduction to Data Analysis – Power BI (5h) — Fundação Bradesco | Apr 2023

Databases & SQL

- Complete SQL with Google BigQuery for Data Analysis — Udemy | Aug 2024
- SQL 2016 – Creating Database Systems (22h) — Faculdade Impacta | Sep 2023
- T-SQL Programming — Faculdade Impacta | Oct 2025

Programming

- Python – From Basics to Advanced — Jump | Oct 2025

AI & Cloud

- Introduction to Large Language Models — Google Cloud Skills Boost | Aug 2024
- Introduction to Generative AI — Google Cloud Skills Boost | Jun 2024

Data Engineering

- SAS Data Engineering Certification — Udemy | Sep 2023

SOFT SKILLS

- Strategic Communication: Ability to translate complex data into accessible storytelling for both technical and non-technical audiences
- Analytical Thinking: Breaking down complex problems and developing data-driven solutions
- Cross-Functional Collaboration: Experience working with marketing, product, technology and business teams
- Problem Solving: Structured approach to root cause identification and scalable solution implementation
- Project Management: Leading end-to-end analytics projects from discovery to delivery
- Results Orientation: Focus on deliverables that generate measurable business value
